ABOUT

I am a former medical doctor. Since I have always loved working with people and wanted to have a meaningful job, I concluded that medicine is tailor-made for me.
It was not. It took me a long time to realize that only working in logical, highly precise, and fully predictable bounds that simultaneously allow for endless creativity is something for me. Enter programming and front-end development. I cannot imagine anything that could fit me better.

PROGRAMMING PROFILE

JavaScript   React.js   Redux

TypeScript   CSS3   HTML5

web development   RWD   Agile

EXPERIENCE

2023 Nov. - 2024 Mar.

Front-End Development Mentee
Dare IT
- Dare IT Mentoring is a 4-month program helping women start their careers in IT
- Chosen as one of 1,000 candidates applying for 120 spots
- Working on my front-end skills during 1:1 sessions with my mentor and expanding my knowledge and network thanks to HR consultations, thematic webinars & networking meetings

CONCEPTS & APPROACHES

REST API	Object-Oriented Programming	Agile (Scrum)

2022 Dec. - now

Front-End Development Learner under Mentor Guidance

Freelance

- Developing my own React.js app "IBOS"
- Production version: **ibos.netlify.app**
- IBOS (I Build On Strengths) is a mock online shop selling gadgets based on Gallup StrengthsFinder Themes
- Front-end code was **entirely written by me**
- Based on functional components, CSS modules and Redux for global state management
- My mentor is responsible for back-end setup (Supabase), UI design & acts as the Product Owner
- Backlog based on user stories
- Work based on code reviews and pull requests under my mentor's supervision
- Stack:
  React.js | Redux | JavaScript | TypeScript
  CCS Modules | React Router | REST API

My core resources for learning programming:

- MDN Front-End Developer Guide
- MDN-recommended Learn JavaScript course by Jad Joubran
- MDN | React | Redux | TypeScript Docs
